

THREE
PURIFYING INTIMATE WASH/MIST

CONCEPT

Wednesday, December 4, 2019: Launch

Delicate care using the gifts of nature.

The smell of sweat and secretion around delicate areas which may become sensitive.

It may become more noticeable not only because of the weather and your physical condition, but also because of things that make you worry and cause stress.

Our mind, body, and skin.

Because these areas are affected by anything and everything, experience the feminine and healthy comfort created by the natural ingredients selected for those delicate areas, just like our facial care products.

To maintain your feminine rhythm and be cheerful at any time. Delicate care unique to THREE is now born.

<Purifying Intimate Wash/Mist-common components>

Vitex agnus-castus extract

Fruit extracts from the plant known as the chaste tree (pure tree). The extract has been known to be beneficial for women, used for herbal tea and health food products. Helping to improve water balance, adds to gentle firmness and smoothness and reduces signs of dehydration.

THREE PURIFYING INTIMATE WASH

THREE Purifying Intimate Wash

<Body wash> 99% naturally-derived ingredients 100mL 3,800 yen (excluding tax)

Body wash dedicated to delicate areas, carefully cleansing the skin and maintaining that refreshed feeling.

Mildly acidic liquid soap with similar pH of the skin.

Delicate areas have numerous apocrine glands, and because they may perspire easily, they can be the cause of odors.

With refreshing essential oils and botanical ingredients, it leaves a clean and comfortable feeling after washing.

Main moisturizing and emollient ingredients

[Essential oils] Tea tree oil, Mandarin orange peel oil, Eucalyptus radiata oil, Rosemary oil

[Botanical and mineral waters] Hot spring water, Alpinia water

[Botanical extracts] Quillaja saponaria bark extract, Vitex agnus-castus extract, Daylily ferment extract

<How to use> Pour on the hands and wash gently without creating too much lather. Rinse well.
Use for armpits and delicate areas.

Quillaja saponaria bark extract

Quillaja saponaria is a soap bark tree native to Chile, Bolivia, and Peru areas of South America. Compared to saponin that can be collected from other plants, it holds superior detergency and homogeneity; therefore the natural extract can be used as mild cleaning ingredients.

Daylily ferment extract (saccharomyces/daylily flower ferment filtrate)

Daylilies are plants of the lily family, and bloom a beautiful flower for a day. This ingredient is collected by fermenting the daylilies with yeast, giving moisture and creating smooth skin.

THREE PURIFYING INTIMATE MIST

THREE Purifying Intimate Mist

<Body lotion> 99% naturally-derived ingredients 30mL 3,800 yen (excluding tax)

Maintain that refreshing feeling wherever and whenever you want with this mist toner to take with you.

The fragrance of the essential oils, botanical waters, and botanical extracts reduce the discomforting odors of perspiration.

The clean and fresh scent not only eliminates the cause of the odors, but also refreshes the mind. Spend the day freely without worrying about odors.

Main moisturizing and emollient ingredients

[Essential oils] Tea tree oil, Mandarin orange peel oil, Eucalyptus radiata oil, Rosemary oil

[Botanical and mineral waters] Hot spring water, Rose water

[Botanical extracts] Apricot fruit extract, Prickly pear extract, Vitex agnus-castus extract

<How to use> Spray two to three times on a piece of tissue paper and wipe gently.

Use for armpits and delicate areas.

Apricot fruit extract

Apricot cultivation is rare in Japan. This extract is from the fresh fruits of the rare and high-quality apricots grown in Nagano, the leading region for apricot cultivation in Japan. Heals damage and achieves a healthy and glowing skin.
